

LOHAS  
COAT 

## Instruction manual

Thank you for choosing a agney\* product.  
Please read this manual before using this product.

# LOHAS COAT

LOHAS COAT is a coating technology developed in-house that suppresses e-coli and staphylococcus aureus thanks to a synergistic effect of the paint that contains natural green tea ingredients and phytoncide already a component of the bamboo itself. All agney\* tableware utilizes this new LOHAS COAT technology, allowing us to manufacture safer and more reliable natural dishware.

\* This coating is not guaranteed to control all bacteria or have permanent benefits.

A six-layer coating that penetrates into the material prevents discoloration and staining by foods. You can use this product every day with peace of mind.

## Care after use

This product can be washed using residential dishwashers.

\* Limited to use at a warm water temperature setting not higher than 70°C.

\* Dishwasher detergents containing bleaching or abrasive agents cannot be used.

- After using this product, use either a residential dishwasher or a soft sponge with a neutral detergent for tableware to wash it carefully with water.
- After washing the product, carefully rinse off the detergent, wipe it dry with a soft cloth, and then store it away from direct sunlight.

- \* This product was individually handmade from natural materials. Please be aware that there may be differences in hue, shade, and shape depending on the product.
- \* We can not assume the responsibility for problems or damages resulting from failure to observe instructions given in this instruction manual.
- \* Please understand in advance that this service may altered without prior notice or suspended or terminated after a set notification period.
